Quaker United Nations Office

The Quaker United Nations Office, located in Geneva and New York, represents Quakers through Friends World Committee for Consultation (FWCC), an international non-governmental organization with consultative status at the UN. QUNO works to promote the peace and justice concerns of the Religious Society of Friends (Quakers) from around the world at the United Nations and other global institutions. It is supported by the American Friends Service Committee, Britain Yearly Meeting, the worldwide community of Friends, other groups, and individuals.

Years of Fresh Water:
A Reference Guide to Resources
Supporting Water-related Projects

Anna Brown
Quaker United Nations Office
October 2003

Acknowledgements

This guidebook would not have been possible without the help of many people. A million thanks go to Lori Heninger at QUNO for unfaltering support and clarity. Alvaro Umaña, Ingvar Andersson and the UNDP Environmentally Sustainable Development Group deserve many thanks for guidance, support, and input. Thanks to Aaron Wolf for helping to seed this project. Thanks to Dave Elder for insight and to the Foundation Center for materials and suggestions. Special thanks to Diana Quick for her expertise and sense of design that enabled this guide to make it to the printer. The support of Sarah Clarke, Jack Patterson, Peter Idwasi, Susan Lawless, Jessica Huber, Hala Hasan, Ernie Buscemi, and Colin Cheney has been instrumental through all stages of this endeavor. Finally, thank you to the UN staff, Representatives, and NGOs who demonstrate a steadfast commitment to improving access to and equitable distribution of water, food, health care, sanitation, education, and security for all. For, meeting the basic needs of all people is fundamental to creating a more sustainable, just and peaceful world.

Disclaimer

QUNO does not endorse any of the funding sources or the policies of the institutions mentioned in the publication. Instead, QUNO provides you with information so that you can consider your project needs in relationship to the granting institutions. It is the view of QUNO that users of this guide are in a better position to determine whether or not funds from a given institution will help to meet or hinder the project and community goals. In addition, use of this guide does, by no means, guarantee funding.

Organizations and institutions are the concrete manifestations of assumptions about society, including economic, political, social and cultural dimensions; the policies they pursue reflect their values and, at their best, the combined experience of themselves, those they serve, and the larger impact of those policies. In this publication, QUNO has chosen to outline a broad spectrum of potential funding sources, rather than analyzing the orientation or policy leanings of each funding institution. To provide such an analysis would, itself, require a much longer and more comprehensive document. Since such a breakdown is not undertaken in this publication, QUNO strongly urges you to examine the policies and practices of prospective funding institutions before you determine which funds you will pursue.

QUNO would, however, like to briefly detail our thought process in navigating this difficult and complex territory. The process of determining whether or not to include or exclude funding institutions in this book was the source of much deliberation. Some funding bodies included have been heavily criticized publicly for their lending and granting policies, citing failure to bring about improvement in living standards or through the imposition of guidelines that may not be in the best interest of all in a locality, country or region. To make matters more complex, all users of this guide, and their respective communities and nations, will have differing and varying goals,

objectives, and circumstances that will shape the use of this publication, and the funds that it describes.

Given the complexity of properly addressing fresh water concerns, and the clear and present need for capital to invest in order to do so, QUNO determined that it should make as wide a spectrum of funding sources available as possible. While Years of Fresh Water does not directly address the subject of water and privatization or public/ private partnerships, QUNO recognizes the controversy surrounding these complex topics. For example, many of the funding institutions outlined in this publication may have policies that specifically advocate models of privatization. Consequently, QUNO advises users of this guide to carefully and deliberately examine the risks and benefits of different privatization models. Indeed, privatization of water resources or water services has in many cases resulted in systems that fail to provide for the people living with the greatest need. That said, QUNO also urges users to consider the risks and benefits of adhering to non-privatization models of providing water and sanitation to communities.

We wish you the best in your endeavors.

- 170 Appendix 18: Other Information Sources

INTRODUCTION

It is a story familiar to many: a long walk, maybe more than once each day, to fetch water for basic family needs. Maybe the water is clean and pure, but more often than not it is unsafe to drink, muddied or otherwise contaminated. Alternatives don't exist, so the water is consumed and prayers are said that it will not bring illness upon the family, upon the little ones. Or maybe the boys go off to school, leaving the girls behind. A lack of sanitation facilities at the schoolhouse provides no safe, respectable place for girls to relieve themselves, adding further reason for girls to stay home from school and attend to family related tasks. Women and girls often suffer disproportionately from the lack of fresh water and sanitation as they are primarily responsible for the daily walk for water, for tending to domestic duties, and for caring for sick family members.

This is the story for many people around the world, and there are too many other accounts that emphasize the same troubling reality. Over a billion people do not have access to drinking water, and even more cannot access *safe* drinking water. Another 2.4 billion people lack access to basic sanitation. The implications of this global challenge are far reaching as about 60 percent of the illnesses in the world are water-related. Some six thousand children die *each day* from diarrheal diseases—preventable diseases.

Water has no substitute. It is the basis of our biological, social, economic, ecological, and spiritual needs. This vital resource determines the health of humans and ecosystems. Whether providing the food we eat, creating the power serving our communities and industries, or enriching the cultural and spiritual practices that make us whole, water is critical to our lives.

A growing awareness has spread about the clear and present global water crisis and its repercussions upon political, economic, and cultural spheres of life. In the past few years, fresh water and sanitation issues have come to light in international arenas, bringing attention to the crisis. The United Nations Millennium Summit (2000) brought

forth a set of “Millennium Development Goals” (MDGs) with the aim of cutting poverty in half by 2015. Many of these goals relate to fresh water concerns and recognize that a lack of access to water is both a cause of and contributor to poverty (See Appendix 1 for a complete list of the UN Millennium Development Goals). Another water-related goal proposes to reduce by half the number of people without access to water by 2015. Recently, at the UN sponsored World Summit on Sustainable Development (Johannesburg, 2002), a new target was added: halve the proportion of people without access to sanitation, also by 2015. The water problems of our day gained further recognition when the UN General Assembly declared 2003 the International Year of Freshwater. This designation has spurred a number of efforts, in particular to stimulate progress toward meeting the water-related Millennium Development Goals and the outcomes of the World Summit on Sustainable Development.

After a decade of discussions about sustainable development, including fresh water problems, diplomats are tired of lofty talk with little to show for it. They are tired of complex negotiations and agreements without funding modalities for implementation, which yield little improvement on the ground. On the ground, mothers are tired of tending to sick children and babies who need clean water to cure numerous ailments. Girls are tired of toting murky water several kilometers each day, often at the expense of education. Fishermen tire of losing their livelihood to polluted waters and disrupted ecosystems. Farmers, representatives of industry, and others dependent on water resources grow tired of battles over rights and access to this precious resource. The time is ripe for real changes that will translate into greater access and less burden for the people who need it the most.

In order to effectively address the water challenges of our day, there is a need for increased political attention, significantly increased funding streams, and wiser spending that will directly benefit populations most in need. International summits and meetings have drawn attention to the fact that there are limited funds available for water-related initiatives. Some experts project that U.S.\$100 billion additional dollars will be required each year until 2015 in order to meet

the goals associated with water as set forth at the Millennium Summit and at the World Summit on Sustainable Development. However, while there is no question that further financial commitments are essential to meeting established water-related goals, there is an equally pressing need to clearly outline the resources that currently are available to fund these endeavors.

Years of Fresh Water: A Reference Guide to Resources Supporting Water related Projects is a tool intended to help practitioners find and effectively use these resources. Sparked by the International Year of Freshwater and the increased attention to fresh water challenges, *Years of Fresh Water* aims to help communities and governments provide clean, safe water and sanitation for all people. It is a launching pad for national governments, municipalities, non-governmental organizations, community-based organizations, and others working to alleviate the suffering that arises from unmet water needs. In creating this reference book, the Quaker United Nations Office has strived to provide resources that will assist stakeholders in accomplishing a wide range of water related activities. Focal areas include, but are not limited to, access to safe water supply and sanitation, water resources management, good governance, and capacity building. For a complete list of project types outlined, see *Table 2*. *Years of Fresh Water* is a tool to help meet and go beyond the goals of halving the number of people without safe water and sanitation. Contained in these pages are listings of a number of different potential funding and support sources directed toward water-related projects. It is not exhaustive, nor will the use of it ensure funding; however, the list can serve as a jumping off point and if used in a creative, proactive, and diligent fashion, the information in it can help stakeholders to make positive movement forward toward tackling the water crises before us.

The challenges ahead are daunting, but solutions are possible. Most often, the best answers come from people on the ground who have a grasp of the factors contributing to the problems and potential mitigation strategies. We hope that *Years of Freshwater* will serve as a reference toward building practical solutions to ensure that, indeed, all people can enjoy fresh water today and for generations to come.

HOW TO USE THIS GUIDEBOOK

This reference book contains information about ninety different potential funding sources for water-related projects as well as regional contact information for many major donors and support organizations. For each donor, we have supplied information about the types of projects generally supported, the scale of the support most often granted, who is eligible for receiving funds, and ways to contact the organization. In addition to the compilation of funding sources, *Years of Fresh Water* also contains an appendix in the back of the book with detailed contact information for many of the larger donors and international finance institutions that have regional offices. This information may help you to identify other potential donors and initiatives that could assist you as you work to address the water challenges in your community or nation.

LAYOUT

All of the information about potential donors is laid out in a standard format in the main section of this reference guide, “Resources.” Categories include the name of potential funding organizations, the types of projects supported, and contact information. See *Table 1*, for a template of the information provided for each donor. The funding sources are listed in alphabetical order. In the event that there are multiple donor organizations for a given project and no primary granting body, these resources will be included alphabetically, after the listings of individual donors.

TABLE 1: TEMPLATE FOR INFORMATION LAYOUT

Organization: This section indicates the name of the donor(s) or institution with potential funds or other resources

Project Name: The name of project(s), if specified

Project Type: This section indicates the types of project(s) that the organization tends to support, if this information is specified

Project Description: This section provides additional details about project(s) supported or types of programs the organization tends to support

Project Scale: This section indicates the range of finances generally available, if specified. In cases where this information is not specified, an attempt has been made, when possible, to qualitatively assess the scale of the project (for example, community level—smaller scale vs. national level—larger scale)

Resource Type: This section specifies the type of resource offered (i.e., financial, technical, information, networking capacities, product donations, etc.)

Target Audience: This section attempts to provide information as to the region or country of focus, if specified. When possible, this section also indicates the target level of resources provided (for example, community-based organizations (CBOs), non-governmental organization (NGOs), municipalities, national government)

Contact Information: Information is provided in this section as to how the organization can be contacted as well as the means to find out further details about the type of programs supported. In some cases, this includes only a mailing address, which makes the process cumbersome. In other cases, only electronic contact information is provided, which also presents a challenge for many. In all cases, an effort has been made to compile as much contact information as possible.

Other: This provides a space for further notations about the organization and funding limitations. This is also where the guidebook directs you to any relevant appendices, most of which provide more detailed or region specific contact information.

TYPES OF WATER-RELATED PROJECTS

The classification of “Project Types” has come about by examining materials about each funding body. In some cases, the selected terms have been used directly by donors. Other times, the Quaker United Nations Office has classified funding bodies into specific “Project Type” categories as a result of research. Often the definition for “Project Type” used by one funding body may hold a slightly different meaning for another funding body. In spite of the imprecise nature of categorizing projects, an effort has been made to offer a generic description of each type of project (See *Table 2* for complete list of “Project Types”). As always, before applying for funds, it is important that you develop a sense of what the donor is looking for and how they define their terms. In many cases, funding institutions show interest in a particular theme, which may or may not directly relate to water (for example, women, health, or community development). As you explore possible sources of support for your project, it is important to consider how your needs intersect with the interests and concerns of the potential funders. For example, if a foundation demonstrates interest in gender concerns, they might be inclined to support a project that specifically works to provide women with more opportunities to take part in decision making processes related to water supply and sanitation.

TABLE 2: PROJECT TYPES

PROJECT TYPE	EXPLANATION
Capacity building	Capacity building projects tend to help develop the tools, knowledge, and means for people in the country/community to address water related needs. Programs might include training opportunities for people working in the water resources management sector. Other projects might help provide strategies to actively engage more citizens in decision making processes.
Children/youth	Projects with a focus on children/youth examine the ways in which water needs affect this sector of the population. These projects might also work to engage children and youth in finding solutions to the water related problems (for example, providing educational materials to children on the importance of hand washing as a way to prevent illness).
Community development	Community development projects include a wide-range of efforts, though the focus tends to be on ways to strengthen and support communities. Often this can translate to projects that promote collaboration between civil society (including indigenous peoples, women, youth, and other under-represented populations), different levels of government, the private sector, and other stakeholders in identifying problems and solutions.

PROJECT TYPE	EXPLANATION
Conservation/ preservation/ restoration	<p>These projects tend to focus on ecosystem or habitat protection or restoration. Projects may include land and/or water ecosystems. Land degradation often has detrimental impacts on fresh water ecosystems, including erosion, silting, pollution, and destruction of fresh water habitats. Projects might also consider ways to protect biological diversity, recognizing the long-term benefits that biodiversity can provide for human and natural systems. Often conservation and preservation implies limiting access to or setting aside land/watersheds for protection.</p>
Development	<p>Development projects tend to address the economic and/or social needs of a population. Often the funding body focuses on a particular set of issues, (such as urban, rural, sustainable economic development), which are indicated in this guidebook by parentheses.</p>
Education	<p>Education projects emphasize the role that awareness-building and knowledge can play in solving problems related to water. Education projects could focus on raising awareness among certain sectors of the population (for example, educating mothers and children about ways to promote good hygiene). Projects might also link closely with “training/technical assistance” or “capacity building,” initiatives, especially when focused on educating people working within the water sector.</p>

PROJECT TYPE	EXPLANATION
Engineering/ infrastructure/ technology	Engineering/infrastructure/technology projects often support building or design efforts. In the context of water, it might translate to the creation of sanitation/wastewater treatment facilities, hand pump installation, water piping projects, or desalinization projects. Projects might also include technological advancements to maximize water use efficiency.
Environment and natural resources	Projects under environment and natural resources may include a wider focus than those conservation/preservation/restoration, as the emphasis is not necessarily on setting aside resources. Projects might address concerns related to water quality, ground water, energy, the intersection between human health and the environment, sustainable production in industrial practices, and sustainable consumption of water resources on the part of the public and private sectors. Projects could also focus on protecting ecosystems and habitat and may consider ways to best manage natural resources.
Fisheries	Fisheries projects address the challenges associated with balancing water needs for ecosystem health with human needs. Projects might look at ways to ensure long-term protection of fish species and habitat or they might address problems related to water pollution, which negatively affects the health of fisheries.

PROJECT TYPE	EXPLANATION
Food security (including agriculture)	Water is crucial for growing crops and producing food. Projects focused on food security might examine ways to grow crops that are more suitable for arid regions. Other projects might provide support to improve irrigation systems to prevent leakages and inefficient water use. Other potential projects might examine innovative ways to make wastewater clean and safe for irrigation use.
Good governance	“Governance” refers to the exercise of economic, political, and administrative authority to manage a country’s affairs at all levels. It includes the mechanisms, processes, and institutions through which citizens and groups articulate their interests, exercise their legal rights, fulfill their responsibilities, and mediate their differences. Governance is not “government” per se, but covers the manner in which power is balanced in the administration of a country and the relationship between state and society. Projects aimed to address “good governance,” with regard to water, focus on ways to establish the structures needed to bring about an equitable balance of interests and power within government, corporations, civil society and the like. It often calls for efforts to drive out corruption and bring in greater participation from all parties (also called stakeholders), including public voices (especially the voices that are not often heard, like women, indigenous peoples, and the disabled), government, and the private sector.

PROJECT TYPE	EXPLANATION
Health	Health related projects tend to focus on the ways in which access to safe water and/or sanitation can improve the health of individuals and communities. Projects might include initiatives to promote good hygiene practices, such as hand washing.
Information	Projects that are categorized as information most often do not provide finances for projects, but offer information and materials related to specific water related issues. In some cases, these materials are intended for direct distribution to a wider population (for example, information water conservation practices), but other times the information can assist organizations and groups in building a network of experts and others who can offer assistance. Access to good, reliable information is a basic element needed for problem solving.
Not specified	The designation, “not specified,” indicates that the granting institution has not defined the types of project that it supports nor has enough information been available to the Quaker UN Office to determine an appropriate category.
Research	These projects provide an opportunity to examine a particular issue, or part of an issue, in order to better understand it and develop effective solutions. Often research projects are associated with universities, policy organizations, or other institutions that specialize in this type of work.

PROJECT TYPE	EXPLANATION
Sanitation	These projects focus on extending access to sanitation to the populations currently without or with limited service. Initiatives might include the building of latrines, for example.
Science	These projects might involve efforts to develop science-based solutions to water related problems or could involve science-based research or educational endeavors.
Training/technical assistance	These projects are often closely linked to those of “capacity building” as both aim to educate and provide tools and means to address a particular problem or set of problems. Training/technical assistance projects often connect with institutions with expertise in a certain area that can help share or transfer some of that knowledge and expertise. Training may include technical assistance.
Trans boundary waters	These projects focus on watersheds that cross political boundaries. Of late, considerable attention has focused on the potential for conflict over transboundary waters, given the complex political nature of management of these shared resources. While the potential for conflict does exist, there are extensive examples of cooperation around these waters. Transboundary waters projects might focus on ways to establish institutions (in the form of treaties or commissions) that involve all of the different parties (stakeholders) in water-use decision making and planning. Emphasis might be on ecosystem conservation or protection, or might look at

PROJECT TYPE	EXPLANATION
Trans boundary waters (cont.)	the potential economic and social benefits available through cooperation between different parties sharing a watershed. Often, transboundary waters refers to international fresh waters, but not in all cases.
Water resources management	Funding bodies that focus on water resources management support projects that consider ways to integrate concerns and interests of different water sectors (water supply, sanitation, irrigation, ecosystem protection, to name a few) into the management of water resources. Projects support efforts to develop approaches that ensure social, economic, environmental, and technical dimensions are taken into account.
Water supply	These projects focus on ways to expand access to safe water to populations currently without or with limited supplies. These projects might consider ways to make water supplies affordable. Other efforts may support the installation of hand pumps.
Women	These projects take a particular look at the way that water-related challenges affect women, a sector of the population that is often marginalized and not included. Projects might also offer ways to reduce the gap between men and women in terms of decision-making, participation in community planning, health, and education.

USING THE INDEX

The index in the back of this guidebook will help to direct you to potential funding sources based on the type of project you are trying to support and/or your geographic region of interest. When referring to the index, it will be helpful to search for funding sources based on the “Project Type,” which classifies the sorts of initiatives that each funding body tends to support (See *Table 2* for descriptions of all project types). It will also be helpful to search for funding and support by regional and country classifications. When checking the index by geographic region, it is a good idea to look both at the region of focus (Africa; Asia and Pacific; East Africa; Eurasia; Europe; Central and Eastern Europe; Latin America and Caribbean; Middle East; North Africa; North America; South America; South Asia; Southeast Asia; Southern Africa; West Africa; Not specified geographically) as well as the specific country. The regional classifications are not always cross-referenced with specific countries.

COMMON ACRONYMS

CBO	Community based organization
GEF	Global Environment Facility
MDG	Millennium Development Goals
NGO	Non-governmental organization
QUNO	Quaker United Nations Office
UNDP	United Nations Development Programme
UNDP-GEF	United Nations Development Programme-Global Environment Facility

SUBMITTING PROPOSALS

The primary aim of *Years of Fresh Water* is to outline resources available for water-related projects. This reference guide does not focus on proposal writing, but will provide a very brief outline of some of the common components that go into a proposal or application to request funds. There are a number of materials available, which can assist in learning how to write strong proposals and many are accessible through the World Wide Web. It is highly recommended that you explore some of these proposal writing materials. If you understand the expectations of donors and have a sense of how to effectively portray your idea, it can have a big impact on the success of your search for resources.

When requesting funds/resources from a donor, the requirements will vary depending on the institution and program to which you apply. It is always essential that you check with the institution to which you are applying for specific details and expectations.

Letter of inquiry

Most often, the first step to approaching a foundation or other donor is in the form of a “letter of inquiry,” in which you state your interest and briefly outline your idea. If the letter of inquiry sparks interest from the potential donor, then you may be asked to submit a formal proposal or application. In the early part of your search for funding, you may need to send out many letters of inquiry before you capture the attention of a donor.

Proposal

A proposal is generally made up of a detailed description of the project and the amount of funding requested. In many cases, you must only submit a formal proposal if the funding body requests your application, after having reviewed your letter of inquiry. Often the proposal takes the following format:

- Executive summary: provides an overview of the entire proposal

- Statement of need: outlines why the project is necessary
- Description of the project: includes a detailed description of the plan of implementation as well as an indication of how the project will be evaluated or measured
- Project budget: outlines in a detailed fashion how much money you will spend and how you will spend it
- Information about your organization, including the mission statement of your organization
- Brief conclusion

Before you send your letter(s) of inquiry, it is a good idea to prepare a well thought out concept paper, which elaborates on ideas submitted to potential funders. By preparing this concept paper ahead of time, it will make it much easier for you to craft a formal proposal if a donor asks you to submit an application. Since most proposals must be submitted on a tight time schedule, it will make the process much more organized if you don't have to scramble to pull together all of the information needed for the proposal or application.

Additional materials requested

In general, when you submit an application or proposal, some form of the following information is often requested. Be sure to clarify with the donor what information is expected of you. In some cases, this material can fit into the text of your proposal, but other times it can be included as attachments.

- Information about the population that the project would serve
- A copy of your organization's budget for the current year
- A copy of the most recent annual report or audited financial statement
- A copy of a statement indicating "not-for-profit," or "non-profit" status. Many of the donors that are based in the United

States seek specific documentation of “501c-3” status, which is a designation by the Internal Revenue Service (IRS). Such a statement helps to provide verification that the organization is legitimate and truly doing what it says it is doing. It will be important that you contact the potential donor early on to find out the guidelines related to this common requirement.

- A timetable for implementation and evaluation of the project

OTHER CONSIDERATIONS

Always check with the granting institution before submitting a proposal or letter of inquiry.

There are a number of reasons why it makes sense to check with the potential funder before tailoring a proposal and sending it out. Often institutions change their terms of giving, or shift their focal areas. Save yourself the work and frustration by always making contact with the granting body to ensure that they still support the programs or focal areas that are listed in this reference book. Even if the program of interest is still the same, it is helpful to get a clear sense of what types of projects the institutions has funded in the past and what guidelines they look to support. This information can help you to modify your proposal to better match the criterion of the giving body.

Another important reason to double-check with the giving institution before submitting a proposal is to be certain that you have the correct contact information. Offices do move and it is important to be sure that you have the most up-to-date information. If you are sending in a letter of inquiry or a project proposal, try to direct it to the appropriate person. Depending on the institution, there might be a number of different people who cover water-related programs. Try to find out the name of the person who is most directly connected to your interests and who reviews proposals (often this person is called a Grant Officer).

Target the right donors.

When seeking out funds or other resources, it is important that you are targeting the right level of support. Donors have different requirements for who can receive funds and other resources. In general, regional and country banks give monies to country governments and often only to member countries. Sometimes these funds can be dispersed to non-governmental organizations (NGOs), community-based organizations (CBOs) or other bodies, but only if they are partnered with a country. Other funds can go directly to NGOs or CBOs. It is generally more difficult to find financial resources for individuals, aside from some scholarship funds. Foundations and other donors most often require that they give funds to a registered non-profit organization, as opposed to individuals or informal organizations which lack accreditation. When foundations and other granters provide monies to NGOs or non-profit organizations, they have stringent requirements, asking for documentation that the organization is a certified non-profit organization. Check with the granting body for find out specific details. Many U.S. based foundations ask that grantees are certified “501 c-3,” which is a non-profit status in the United States. Other countries have different designations. Essentially, the foundation wants to be assured that their monies be well spent, that funds will go to the proposed project, and that the organization has the capability to make wise use of resources. As a result, donors support organizations that have a record of credibility.

The road to securing funding is often long and frustrating.

While it is important to maintain a positive outlook as you seek out ways to finance and support your project, it is important to recognize that it is not an easy process and that funding is in no way assured. *Years of Fresh Water* outlines a number of potential sources, but it is a competitive market. It is easy to enter the process with high expectations: you have a good project, the foundation has a lot of money—it is a solid match, right? Unfortunately, it is not always that simple. There will be times

when you feel like you are working very hard with little to show for it. Other times, you might feel weighted down by details and paperwork, which seem frustrating and excessive. All of this is part of the process and you'll learn as you go. Chances are, you'll get rejection letters, probably many (again, because it is part of the process). When possible, try to find out why your proposal was not accepted as this will help to inform future grant/loan applications.

LIMITATIONS

The information contained in this reference guide is not comprehensive, as many potential resources have been left out. It is a first endeavor to outline funds for water related projects and is intended to be a starting point. Unfortunately, this reference is currently only available in English, which presents obvious limitations in terms of accessibility; the hope is to provide translations in future printings. An effort has been made to provide as much contact information as possible that does not require a computer or the Internet. That said, access to the Internet, when possible, can provide a window into much valuable information, both about the resources outlined in this guidebook and others not cited. In some cases, the only contacts provided are electronic. Other times, the postal address is the only available contact information. Since funding bodies will inevitably change, the information in this guidebook is current as of August, 2003. It is essential to do follow-up work to check the accuracy of the information provided, before going to the trouble of submitting a request for funding.

RESOURCES

A

Organization: African Development Bank

Project Name: Unspecified

Project Type: disaster relief/emergency assistance; fisheries; good governance; sanitation; water resources management; water supply; women

Project Description: The African Development Bank is dedicated to combating poverty and improving the lives of people of the continent. The Bank is engaged in the task of mobilizing resources towards the economic and social progress of its Regional Member Countries.

Project Scale: \$500,000-\$78,000,000

Resource Type: Loans; grants

Target Audience: Member country governments (primarily Africa)

Contact Information:

African Development Bank

Temporary Relocation Agency (Tunis)

Organization: Angelcare (also known as Children's ANGEL-CARE Aid International)

Project Name: Unspecified

Project Type: community development (especially children); education; health (especially nutrition)

Project Description: The organization focuses its giving activities on educational, medical, nutritional, and community development programs, especially those affecting children.

Project Scale: Unspecified

Resource Type: Financial

Target Audience: Organizations eligible to receive grants are either branches of Angelcare or partner agencies indigenous to the country of the project. Target regions include: Africa; Canada; Central America; Eastern Europe; Latin America; Mexico; Philippines; Southeast Asia

Contact Information:

Angelcare

P.O. Box 600370

San Diego, CA 92160-0370 U.S.A.

Contact: T.J. Grosser, Ed. D., D.D., President

Tel: +(619) 593-1222; +(888) 264-5227

Additional tel.: +(888) 264-5227

Fax: +(619) 593-0222

Email: info@angelcare.org

Website: <http://www.angelcare.org/>

Other: This institution does not accept applications, but works with Angelcare partner agencies indigenous to the country where project takes place. While this institution does not explicitly fund water related projects, the heavy emphasis on providing services to children overlaps heavily with the need to meet water related needs.

Organization: Arab Gulf Programme for United Nations Development Organizations (AGFUND); United Nations Educational, Scientific and Cultural Organization (UNESCO)

Project Name: AGFUND-UNESCO Fund

Project Type: development; disaster relief/emergency assistance; education; health; research; sanitation; water supply; women

Project Description: The AGFUND-UNESCO Fund was launched to support projects for the preservation and development of freshwater resources. Projects tend to center around education, health, training and institutional structure, often with an emphasis on women and children.

Project Scale: Unspecified

Resource Type: Financial

Target Audience: Not specified geographically

Contact Information:

Other:

Organization: The Asia Foundation

Project Name: Unspecified

Project Type: capacity building (especially to support NGO work toward environmentally responsible, economically sound business practices); development; engineering/infrastructure/technology; environment and natural resources

Project Description: The foundation supports programs that contribute to a peaceful, prosperous, and open Asia Pacific community. It collaborates with partners from the public and private sectors in the region to support the development of institutions,

leadership, and policy in four broad program areas: governance and law; economic reform and development; women's political participation; and international relations.

Project Scale: Unspecified

Resource Type: Financial

Target Audience: Asia and Pacific (See below for country break down)

Afghanistan/Pakistan: Supports reconstruction and development with aim to shift focus on longer-term infrastructure development needs in the regions.

Bangladesh: Supports governmental and private sector institutions that contribute to the Bangladeshi democratic process, while addressing social and economic problems that constrain development.

China: Supports a cluster of projects to bolster China's environmental protection movement.

Indonesia: Supports public and private sector initiatives in Indonesia aimed to create a representative government, promote law and justice, and providing opportunities for education.

Malaysia: Supports efforts to promote good governance; supports the advancement of the nongovernmental organization sector.

Nepal: Supports the media and NGOs.

Pakistan: Supports projects addressing Pakistani women and girls.

Philippines: Supports efforts to promote government accountability and public participation in governance; Supports issues of social justice and sustainable economic development.

Sri Lanka: Supports government and nongovernmental initiatives to strengthen institutions of representative government, assist economic reform, promote public participation

Taiwan: Supports organizations in readying themselves for greater participation in the political process. Specific attention is paid to women's groups. Funding also supports environmental preservation needs.

Thailand: Supports projects to promote economic and environmental accountability; promotes citizen participation in the poli-

cymaking process; encouraging both citizen, government, and private accountability for environmental conservation.

Other:

Organization: Asian Development Bank (ADB)

Project Name: Not specified

Project Type: capacity building;
conservation/preservation/restoration (including issues related to forestry); development; fisheries; good governance; health; sanitation; transboundary waters; water resources management; water supply

Project Description: The ADB recognizes that the poor are hit the hardest by water problems and they are especially vulnerable to water scarcity, pollution, drought and flooding. All of these problems lead to poor health, lower productivity, and degraded quality of life. The ADB aims to promote water security for all people, supporting initiatives that provide access to water services to meet basic needs, enable people to take advantage of the opportunities that water resources provide, protect populations from water-related hazards, and offer recourse where conflicts over water arise.

Project Scale: Not specified

Resource Type: Loans; technical assistance

Target Audience: Member governments in Asia and the Pacific

Contact Information:

Headquarters
Asian Development Bank:

P.O. Box 789
0980 Manila, Philippines
Tel: + 632 632 4444
Fax: + 632 636 2444

Email: information@adb.org
Other: See Appendix 3 for list of country offices.

Organization: AT&T Foundation

Project Name: Civic and Community Service; Education

Project Type: children/youth (focused on youth development); community development; development (economic development); disaster relief/emergency assistance (particular interest in disaster preparedness); education; environment and natural resources; women

Project Description: Supports organizations and projects that enhance the effectiveness of the nonprofit sector and promote public policy formulation in matters of children and families, accessibility of health and social services to those in need, the advancement of diversity, and the protection of the environment. Projects should serve as models for other organizations and lend themselves to measurable evaluation, with results that can be disseminated to a wide audience.

Project Scale: Unspecified

Resource Type: Financial

Target Audience: giving generally restricted to regions where AT&T has offices, including Argentina; Australia; Brazil; Canada; Chile; China; Europe; India; Japan; Mexico; Singapore; Taiwan

Contact Information:

Other: Applications generally not accepted.

Organization: Austrian Development Cooperation

Project Name: Water Supply and Sanitation Rural Development; Educational Development/ Vocational Training

Project Type: development (rural); sanitation; training/technical assistance; transboundary waters; water resources management; water supply; women

Project Description: The Austrian Development Cooperation (part of Austria's foreign policy and the development policy of the European Union), aims to secure global peace by addressing issues such as: poverty and social injustice, destruction of the natural and social environments, diseases, and lack of access to education and training. Austria's Development Cooperation works to bridge the gap between rich and poor and to support the economic, social, democratic and ecological development of the countries on a basis of partnership. The Cooperation believes that if projects are to have a sustainable effect, then combating poverty is as important as equal opportunities, respect for democracy and human rights, and careful management of resources. The three broad objectives that the Cooperation aims to address are: 1) promoting sustainable economic development; 2) democratization and peace-keeping; and 3) poverty alleviation and social equilibrium.

Project Scale: Unspecified

Resource Type: Grants; guarantees and loans

Target Audience: Central/Eastern Europe (Albania; Bosnia and Herzegovina; Bulgaria; Croatia; Czech Republic; Estonia; Hungary; Latvia; Lithuania; Macedonia; Poland; Romania; Slovakia; Slovenia; Yugoslavia, former); Central America (Nicaragua; Costa Rica; El Salvador; Guatemala); West Africa Sahel (Burkina Faso; Cape Verde; Senegal); East Africa (Ethiopia; Uganda; Tanzania; Kenya; Burundi; Rwanda); Southern Africa (Mozambique; Namibia; Zimbabwe; South

Africa); Himalaya-Hindu Kush (Bhutan; Nepal; Pakistan)

C

Organization: Cities Alliance (contributors to Cities Alliance: Canada; France; Italy; Japan; Germany; the Netherlands; Norway; Sweden; United States; United Kingdom, Asian Development Bank; United Nations Environment Programme, UN-Habitat; World Bank)

Project Name: Community Water and Sanitation Facility (CWSF)

Project Type: sanitation; water supply

Project Description: The purpose of CWSF is to increase slum residents' access to water and sanitation and to enhance donor impact by partnering the ideas, efforts and resources of the public sector with those of the private sector and NGOs. The CWSF is a facility designed to support community-endorsed construction of improved water and sanitation services in slum communities and to encourage risk sharing and innovative financing of these services.

Project Scale: Grants up to \$500,000. Because CWSF funds are catalytic, CWSF funding cannot exceed one-third of the total cost of a construction or financing activity. For activities meant to develop an alliance, the maximum grant is \$75,000 and requires a 1-to-1 match.

Resource Type: CWSF funds can be used to mobilize financial

and resource commitments from national and city governments, local and international businesses and slum communities. CWSF primarily funds alliance activities that improve water and sanitation access for the urban poor and, on a limited basis, can fund technical assistance for partnership development and learning alliances.

Target Audience: Local and international NGOs; local governments; private businesses; CBOs that represent slum dwellers and that are working in partnership with their local water/sanitation authorities. All applications must be co-sponsored by at least two members of the Cities Alliance (see above list of members under “organization”).

D

Organization: Department for International Development (DFID) (U.K. Government)

Project Name: Civil Society Challenge Fund

Project Type: capacity building

Project Description: Funds aim to build capacity in developing countries to engage civil society in national and in local decision-making processes. This includes enabling poor people to engage both in the decisions about the allocation of resources and the monitoring of performance, and representing the interests

of poor people through effective participation in national level formulation and monitoring of poverty reduction strategies.

Project Scale: up to about \$795,000 for a maximum of 5 years

Resource Type: Financial

Target Audience: United Kingdom-based non-profit organizations; projects focus on developing countries.

Contact Information:

Information & Civil Society Department;

Steve Nally, Deputy Programme Manager (responsible for the administration of the Fund)

Tel: +44 (0) 1355 843199); Tel: +44 (0) 1355 84 3132 (general number)

Other: See Appendix 5 for regional GARNET centers.

Organization: Global Environment Facility (GEF)

Project Name: Transboundary Waters

Project Type: information; transboundary waters; water resources management

Project Description: The GEF works to build support for water-related treaties that countries have been signed to establish rights and expectations of water use (global and regional). The GEF projects are implemented by the United Nations Development Programme (UNDP), the United Nations Environment Programme (UNEP), and by the World Bank. The aim of this initiative is to promote cooperation around water basins.

Project Scale: Range: \$700,000-\$30,000,000

Resource Type: Grants; leveraging finances

Target Audience: Not specified geographically; funds generally directed in concert with national governments

Contact Information:

Global Environment Facility Secretariat

1818 H Street, NW

Washington, D.C. 20433 U.S.A.

Contact: Hutton Archer, Senior External Relations Coordinator

Tel: +(202) 473-0508

Fax: +(202) 522-3240

Website: www.gefweb.org

Other:

Organization: Global Environment Facility (GEF), United Nations Development Programme (UNDP)

Project Name: GEF Full Project Grants; GEF Medium sized Project Grants; International waters

Project Type: transboundary waters

Project Description: The UNDP-GEF emphasis on international waters includes: oceans, large marine ecosystems, enclosed or semi-enclosed seas and estuaries, in addition to rivers, lakes,

groundwater systems, and wetlands with drainage basins that overlap or share borders. The purpose of the international waters focus is to address the challenges that arise from poorly managed and uncoordinated human activities. Major threats include sea and land-based pollution, depletion of freshwater resources, habitat loss, introduction of exotic species, and over-harvesting of living and non-living aquatic resources. UNDP-GEF projects address these threats and aim to achieve a comprehensive, ecosystem-based approach to the sustainable management of international waters, while recognizing the need to consider developmental and ecological needs. International waters projects fall under the following categories of Operational Programmes (OP): Water Body-Based Programme; Integrated Land and Water Multiple Focal Areas; Contaminant-Based Programme; Integrated Ecosystem Management (Multifocal).

Project Scale: Full Project: up to \$1,000,000; Medium sized project: less than \$1,000,000; Enabling activities (grants for the biodiversity, climate change focal areas, and for persistent organic pollutants): unspecified

Resource Type: Financial

Target Audience: Not specified geographically; governments; civil society; NGOs; and other regional organizations. The eligibility of a country to receive funds depends upon whether the developing countries have ratified relevant treaties and are eligible to propose biodiversity and climate change projects. Other countries, particularly those with economies in transition, are eligible for grants provided that the country is a party to the appropriate treaty and is eligible to borrow from the World Bank or receive technical assistance grants from UNDP.

Contact Information:

Global Environment Facility Unit (UNDP-GEF)
Environmentally Sustainable Development Group, BDP
304 East 45th Street, 9th Floor
New York, NY 10017
Contact: Frank Pinto, Executive Coordinator

Tel: +(212) 906-5044

Fax: +(212) 906-6998

Website: <http://www.undp.org/gef/index.html>

Other: To make initial contact, first contact the relevant UNDP country office and the headquarters office in New York (see Appendix 6 for regional UNDP offices). Individuals and groups proposing a project must meet GEF criteria: 1) the project must reflect national or regional priorities and have the support of the country or countries involved; 2) the project must improve the global environment or make steps toward reducing risks to the global environment.

Organization: Global Environment Facility (GEF), United Nations Development Programme (UNDP)

Project Name: GEF-funded Small Grants Programme

Project Type: sanitation; transboundary waters; water resources management; water supply

Project Description: The Small Grants Project provides financial and technical support to projects in developing countries that conserve and restore the natural world while enhancing well-being and livelihoods. In the international waters focal area, activities must address environmental concerns in a specific water body shared by two or more countries (such as freshwater drainage basin that is regionally significant or a large marine ecosystem), or address land-based threats to international waters.

Project Scale: Up to \$50,000

Resource Type: financial and technical support

Target Audience: Grants given directly to NGOs and CBOs in Albania; Barbados (including Anguilla, Antigua, British Virgin Islands, Dominica, Grenada, Montserrat, Saint Christopher and Nevis, Saint Vincent and the Grenadines, Saint Lucia); Belize; Bhutan; Bolivia; Botswana; Brazil; Burkina Faso; Chile; Costa Rica; Côte d'Ivoire; Dominican Republic; Ecuador; Egypt; El Salvador; Ghana; Guatemala; Honduras; India; Indonesia; Iran; Jordan; Kazakhstan; Kenya; Kyrgyzstan; Lebanon; Lithuania; Malaysia; Mali; Mauritania; Mauritius; Mexico; Mongolia;

Other: Global Greengrants Fund does not accept unsolicited grant proposals or applications. If you have a project that you believe might be of interest to us, please consult the list of advisors posted on the website.

Organization: Global Water Partnership (GWP)

Project Name: Associated Programs (a portfolio of focus areas, including water supply and sanitation, integrated water resources management (IWRM) capacity building, and institutional roles in IWRM)

Project Type: capacity building; training/technical assistance; water resources management (focus on integrated water

resources management, including water supply, sanitation, and river basin management)

Project Description: GWP is a network of regional technical committees in South America, Central America, Southern Africa, West Africa, the Mediterranean, Central and Eastern Europe, South Asia, Southeast Asia, and most recently in China. It is largely through these regional groups that the Partnership promotes the application of integrated water resources management as a critical approach to managing the world's water resources. This is achieved by bringing the various interest groups together to promote cross-sectoral dialogue and to develop action plans to resolve common water problems.

Project Scale: Not specified

Resource Type: Capacity building, training/ technical assistance

Target Audience: Central America; Central/Eastern Europe; China; East Africa; Mediterranean; South America; South Asia; Southeast Asia; Southern Africa; West Africa

Organization: Inter-American Development Bank (IDB)

Project Name: Not specified

Project Type: development; fisheries; health; sanitation; water supply

Project Description: The IDB aims to help accelerate economic and social development in Latin America and the Caribbean. The IDB Charter states that its principal functions are to utilize its own capital, funds raised by it in financial markets, and other available resources, to finance the development of the borrowing member countries; to supplement private investment when private capital is not available on reasonable terms and conditions; and to provide technical assistance for the preparation, financing, and implementation of development plans and projects.

Project Scale: \$500,000-\$200,000,000

Resource Type: Loans, loan guarantees, technical assistance

Target Audience: Latin America and Caribbean member countries, any political subdivision or government organization unit thereof, any independent agency, semipublic enterprise, or private enterprise in the territory of a member country, regional organizations composed of member countries, and to the Caribbean Development Bank.

Organization: International Council for Local Environment Initiatives (ICLEI)

Project Name: The Water Campaign

Project Type: water resources management

Project Description: The Water Campaign is an international movement of local governments and their stakeholders who are committed to achieving concrete improvements in the sustainable use of fresh water resources. The activities of the campaign lay the foundation for systematic identification and evaluation of the water resource management challenges facing local governments

at three levels: municipal corporation, urban area, local watershed areas. The Water Campaign provides local governments with a framework for addressing their unique local water management concerns while contributing to an international effort to address the current global water crisis.

Project Scale: Not specified; projects oriented to local scale

Resource Type: Information, framework for action

Target Audience: Local governments and their stakeholders

Organization: International Development Research Centre (IDRC)

Project Name: Cities Feeding People Program Initiative

Project Type: food security (urban agriculture focus); research; sanitation (focus on urban wastewater treatment); water resources management (urban focus)

Project Description: IDRC's Cities Feeding People (CFP)

Program Initiative recognizes that there are many urban farmers in the world who raise livestock and grow produce to support their families, and where, possible, to generate income. Often water needed for farming is contaminated, which contributes to poor health and disease. Cities Feeding People supports research and development activities that increase the food security and incomes of the poor while maintaining public health and a clean urban environment. The CFP projects are seeking to create a bet-

ter understanding of the constraints faced by urban farmers who are often hampered by unfavorable local policies and limited access to resources. Women producers, in particular, face many obstacles. CFP also supports research that examines the political economy of urban agriculture, including access to credit and investment schemes, the role of UA in the recycling chain, and links with rural agriculture.

Project Scale: Unspecified; tends to be community-based, exploring how local activities can influence national policies

Resource Type: Research (focus on multidisciplinary research and projects to influence policy); technology transfer/sharing; capacity building

Target Audience: Researchers

Contact Information:

International Development Research Centre (IDRC)

P.O. Box 8500

Other: See Appendix 9 for regional contacts.

Organization: International Development Research Centre (IDRC)

Project Name: Water Demand Management Forum

Project Type: capacity building; education; information; research; sanitation; water resources management

Project Description: The Water Demand Management Forum aims to increase awareness of water demand management options (WDM) and demonstrate that there are supply alternatives that are more cost effective. The Forum also works to build and support partnerships to promote appropriate WDM policies and programs. Focal areas include: decentralizing and promoting local water management; water valuation; wastewater reuse (addressing comparative costs, environment, and social conse-

quences of treatment methods); exploring public-private partnerships in water.

Project Scale: Unspecified

Resource Type: Research (focus on multidisciplinary research and projects to influence policy); technology transfer/sharing; capacity building; information

Target Audience: Researchers in North Africa; Middle East

K

Organization: W.K. Kellogg Foundation

Project Name: Latin America and Caribbean (Leadership Development, Citizenship and Social Responsibility; Institution Building and Strategic Alliances; Information Technology)

Project Type: capacity building; community development; education; health

Project Description: Supports groups or clusters of closely articulated projects that pursue integrated and multifaceted responses to locally defined problems. Strategies to promote the development, participation, and leadership of local youth are central to every cluster. Clusters are located within priority geographic areas targeted for their high concentrations of poverty. Cluster areas include: southern Mexico and Central America (including parts of the Caribbean), northeast Brazil, and the southern Andean zones of Bolivia, Peru, and Ecuador.

Project Scale: \$25-\$100,000

Resource Type: Finances

Target Audience: Latin America and Caribbean; preference often given to CBOs (required to have United States 501c-3 status, as a non-profit organization)

Contact Information: Regional contacts:

W.K. Kellogg Foundation

Project Name: Sustainability Science

Project Type: conservation/preservation/restoration; sanitation; water resources management; water supply

Project Description: The Sustainability Science Program of the Packard Foundation aims to expand and develop the knowledge necessary to meet fundamental human needs while preserving the life support systems of earth. This program also anticipates supporting conservation activities that promote paths for human progress that protect and restore the ecological systems upon which all life depends.

Project Scale: Range: \$2,500-\$30,000,000

Resource Type: Finances

Target Audience: charitable, educational, or scientific purposes, primarily from tax-exempt, charitable organizations. Funding is not available for projects that benefit specific individuals or that serve religious purposes.

R

Organization: The Rockefeller Foundation

Project Name: Working communities; Health Equity; Food Security; Africa Regional Program; Southeast Asia Regional Program

Project Type: community development; food security, health; research; women

Project Description: The foundation is a knowledge-based, global foundation with a commitment to enrich and sustain the

lives and livelihoods of poor and excluded people throughout the world. This will be done through integrated programs in food, health, work, and creative expression to employ tools of science, research, analysis, and local knowledge to address daily challenges of the world's poorest. The Fund also supports a renewed effort to catalyze positive change through partnerships. Funding is focused on four themes: creativity and culture; food security; health equity; working communities. The cross-cutting theme is global inclusion. The Africa Regional Program aims to help promote human and institutional capacity building to create effective policies and programs that will improve the lives and livelihoods of the poor. The Southeast Asia Regional Program focuses on the watershed of the Mekong River. The focus is on the "transboundary" challenges that arise from lopsided regional development and the affects of these challenges on the most marginalized, vulnerable, and excluded communities in the greater Mekong Sub-region.

Project Scale: Unspecified

Resource Type: Financial

Target Audience: Africa; Asia; Latin America

Organization: Swedish International Development Cooperation Agency (SIDA)

Project Name: SIDA departments: Water Resources Division (includes rural water, sanitation, water resources management), a sub-sector of Natural Resources and the Environment;

Democracy and Social Development (includes health); Urban Development (includes waste and sanitation), a sub-sector of Infrastructure and Economic Cooperation; Environmental Policy

Project Type: capacity building; health; sanitation; transboundary waters; water resources management; water supply; women

Project Description: SIDA has an extensive partnership with governments, international organisations, NGOs, institutions, companies and universities. SIDA uses these partnerships to ensure that its resources for development cooperation are used as efficiently as possible in alleviating poverty. SIDA's partnership is broad and encompasses many different fields and organizations. SIDA provides resources to NGO's, the public sector, the private sector and to universities. SIDA's thematic policies

include: Promoting Equality between Women and Men; Sustainable development; Justice and peace; Capacity development

Project Scale: Unspecified

Resource Type: Financial, research, training

Target Audience: Public sector; private sector; universities; NGOs (see below for explanation)

Other: See Website for funding limitations. SIDA partners with 13 major Swedish NGOs and does not make direct contributions to other NGOs; other NGOs can apply to any of the 13 major organizations for funding or support (see website for NGO contact information). See Appendix 12 for further SIDA contact information.

Organization: Swedish International Development Cooperation Agency (SIDA)

Project Name: SIDA Water

Project Type: capacity building; fisheries; good governance; sanitation; water resources management; water supply; women

Project Description: SIDA supports efforts to create conditions conducive to change and to socially, economically and environmentally sustainable development. International development cooperation is an investment in ensuring poor people a better life, in environmental conservation and peace, in democracy and equality. It should pave the way for equal relations and make itself redundant. SIDA contributes resources to help partnering countries develop skills to bring about sustainable development.

Project Scale: Not specified; SIDA partners with country gov-

ernments

Resource Type: Financial; training and skill building; consulting

Target Audience: Governments; Swedish-based NGOs (see website for specific NGO information).

Tel: +(330) 452-1144

Other:

Organization: Turner Foundation, Inc.

Project Name: Habitat; Water and Toxics

Project Type: capacity building (focus on public participation); community development; conservation/preservation/restoration; environment and natural resources; fisheries; water resources management

Project Description: The foundation is committed to preventing damage to the natural systems—water, air, and land—on which

all life depends and makes grants in the areas of the environment and population. The Water and Toxics program seeks to protect rivers, lakes, wetlands, aquifers, oceans, and other water systems from contamination, degradation, and other abuses. Priorities are: 1) to strengthen the advocacy, outreach, and technical capabilities of organizations addressing the protection of water systems; 2) to stop further degradation of water-dependent habitats from new dams, diversions, and other large infrastructure projects; 3) to reduce wasteful water use through conservation; 4) to promote allocation of water specifically for environmental purposes, including habitat restoration and fish and wildlife protection; 5) to support efforts to improve public policies affecting water protection, including initiatives to secure pollution prevention and habitat protection; 6) to reduce pesticide use; and 7) to strengthen the advocacy, outreach, and technical capabilities of organizations addressing the disproportionate use and locating of toxic materials in poor and rural areas.

Project Scale: \$150-\$31,028,518; average range: \$25,000-\$250,000

Resource Type: Financial

Target Audience: Argentina; Brazil; Canada (mostly British Columbia); Mexico; Russia

Contact Information:

Website: <http://www.turnerfoundation.org>

Other: On account of a significant decline in the value of the foundation's asset base, the Board has determined it to be in the best interest of the foundation's long-term sustainability to forgo any funding requests in 2003. The foundation also plans to implement an invitation-only process in 2004.

U

Organization: United Nations Development Programme (UNDP)

Project Name: Community Water Initiative

Project Type: capacity building; health (especially household hygiene); sanitation; water resources management; water supply; women

Project Description: The Community Water Initiative provides grants to support innovative approaches to water supply, sanitation at the household and community level. Grants also support local watershed management. All projects should meet the following criteria: demonstrable innovative approaches; focus on community; providing reliable management systems and affordable services; demonstrable reduction in poverty; low cost, appropriate technologies; strong gender mainstreaming approach; and long-term sustainability. The types of projects supported by the Initiative support water supply and sanitation structures; capacity development; exchange of good practice between communities (study visits, national/regional meetings and workshops); documentation and dissemination of good practices; and pro-poor policy development in the areas of water management, water supply and sanitation.

Project Scale: Up to \$20,000 per community

Resource Type: Grants

Target Audience: Targets a select number of countries each year.

Contact Information:

United Nations Development Programme
Environmentally Sustainable Development Program

Organization: U.S. Agency for International Development (USAID)

Project Name: Development Credit Authority

Project Type: engineering/infrastructure/technology; sanitation;

water supply

Project Description: USAID's Development Credit Authority (DCA) allows USAID to issue partial loan guarantees to private lenders to achieve economic development objectives.

DCA partial guarantees help mobilize local capital and put it to work in creditworthy but underserved markets, generally related to infrastructure. These loans cover up to 50% of the risk in lending projects that align with USAID objectives. The DCA credit enhancement has facilitated financing in many sectors, including water and sanitation.

Project Scale: Unspecified

Resource Type: Technical expertise, partial loan guarantees; bond guarantees

Target Audience: Governments; municipalities; CBOs; NGOs; private sector

Contact Information:

U.S. Agency for International Development Information Center
Ronald Reagan Building
Washington, D.C. 20523-1000 U.S.A.

Tele: +(202)-712-4810; +(202) 712-0000 (USAID directory)

Fax: +(202)-216-3524

Website: <http://www.usaid.org> (go to Economic Growth and Trade sector and then look for Development Credit)

Other: The website contains a directory of staff as well as links to USAID Mission staff located in countries around the world. Many countries have websites, which outlines multi-year country strategies and indicates how water related concerns factor into these plans and priorities. See Appendix 13 for country specific contacts.

Organization: U.S. Agency for International Development (USAID)

Project Name: Water For The Poor

Project Type: engineering/infrastructure/technology (especially urban); sanitation; water resources management; water supply

Project Description: USAID's Water for Poor Initiative aims to

improve sustainable management of water resources by accelerating and expanding international efforts to achieve the UN Millennium Development Goals and implement the outcome document of the World Summit on Sustainable Development, the “Johannesburg Plan of Implementation” including halving, by 2015, the number of people without access to safe water and basic sanitation. The US aims to work with other government and with nongovernmental partners in three key areas: 1) access to clean water and sanitation services; 2) improved watershed management; and 3) increasing the productivity of water.

Project Scale: \$21,000-\$19,500,000

Resource Type: Grants; loan guarantees (for leveraging additional monies)

Target Audience: Central and local governments, NGOs, private sector in Africa; Asia; Middle East; Latin America and Caribbean; Europe; Eurasia

Contact Information:

U.S. Agency for International Development Information Center
Ronald Reagan Building
Washington, D.C. 20523-1000 U.S.A.

Tel: +(202)-712-4810

Fax: +(202)-216-3524

Other:

Organization: U.S. Agency for International Development (USAID)

Project Name: Water sector

Project Type: food security; health; sanitation; transboundary waters; water resources management; water supply

Project Description: USAID has identified water related concerns as an important area of focus, making the preservation and environmentally sound development of the world’s water resources a top priority. USAID helps leverage investment to improve access to safe and adequate water supply and sanitation, improve irrigation technology, enhance natural environments, and improve institutional capacity for water resources manage-

ment in countries around the world. USAID operates with the underlying goals of reducing conflict and improving the welfare of people across the globe.

Project Scale: Unspecified

Resource Type: Grants; loans guarantees; local currency investment guarantees (to encourage private investment in water services); technical assistance (limited)

Target Audience: Governments; international organizations; CBOs; NGOs; private sector

Organization: The U.S. Civilian Research and Development Foundation for Independent States of the former Soviet Union (also known as CRDF)

Project Name: Armenian-U.S. Bilateral Grants Program; Cooperative Grants Program; Next Steps to Market Program; Regional Experimental Support Centers Program

Project Type: capacity building; research; science

Project Description: The foundation promotes scientific and technological collaboration between the U.S. and the countries of the former Soviet Union (FSU), and assists researchers of the former Soviet Union to transfer their skills and experience to civilian science. Armenian-U.S. Bilateral Grants Program: In association with the National Foundation of Science and Advanced Technologies (NFSAT), the foundation holds merit-based competition for grants to support research in the areas of natural sciences, mathematics, engineering, biomedical, and behavioral sciences. Cooperative Grants Program provides up to

two years of support to joint U.S. and former Soviet Union research teams in all areas of basic and applied research in the natural sciences, mathematics, engineering, and biomedical and behavioral sciences. Next Steps to Market Program provides grants for a period of up to two years. The program encourages pre-commercial collaboration between U.S. industry and former Soviet scientists on applied research and development projects. Regional Experimental Support Centers Program provides major state-of-the-art equipment and related training to selected civilian research institutes in the FSU. The program supports basic, applied, and industry-related research throughout the region where the institutes are situated. The foundation seeks to place equipment where it can best serve as the backbone for a region's technological and economic development.

Project Scale: Average: \$125,000

Resource Type: Equipment; grants to individuals; finances for research

Target Audience: Former Soviet Union; Armenia; Azerbaijan; Georgia, Republic of; Kazakhstan; Kyrgyzstan; Moldova; Tajikistan; Turkmenistan; Ukraine; Uzbekistan

Organization: Water and Sanitation Partnership (WSP), an international partnership of international development agencies, administered by the World Bank

Project Name: Rural and Small Towns Water Supply and Sanitation; Services for the Urban Poor; Participation and

Gender; Health and Hygiene; Millennium Development Goals
Project Type: capacity building; development (urban, rural);
health; sanitation; water supply; women

Project Description: The WSP works to generate, validate, and disseminate solutions to water and sanitation problems for the poor. The types of partnerships vary, but sometimes help to influence water and sanitation investments. The WSP continues to seek out and disseminate new knowledge and lessons. The WSP focuses on urban issues, as well as those of rural and small towns. WSP helps advise governments on a spectrum of issues, including financing questions and policy formulation.

Project Scale: Unspecified

Resource Type: Advising; information; networking

Target Audience: Governments of member countries (primarily at the national level, however in some cases state level, though in all instances the national government must be behind the project.

Organization: Water Environment Research Foundation

Project Name: Unspecified

Project Type: environment and natural resources; health; research (focus on watershed management; sanitation and wastewater treatment)

Project Description: The foundation provides a balanced water quality research program addressing current wastewater research needs. Grants are made for contracts with partnering institutions or organizations (ie. utilities, universities) to conduct research. This program covers a broad range of water quality issues, including collection and treatment systems, watershed management, human health and environmental effects, and residual management.

Project Scale: Average range: \$75,000-\$300,000

Resource Type: Research

Target Audience: Universities; utilities; NGOs

Contact Information:

Water Environment Research Foundation
601 Wythe St.
Alexandria, VA 22314-1994 U.S.A.
Contact: Stephanie Llewellyn, Product Manager
Tel: +(703) 684-2470
Fax: +(703) 299-0742
Email: werf@werf.org
Website: <http://www.werf.org>

Other: Refer to website for details on current requests for proposals (RFPs), or types of projects the Water Environment Research Foundation seeks to fund; the foundation does also accept some unsolicited grant proposals.

Organization: Watersheds Foundation

Project Name: Unspecified

Project Type: environment and natural resources (including reforestation); water resources management

Project Description: The Watershed foundation contributes to organizations working with Christian foresters in developing countries to reforest watersheds.

Project Scale: Unspecified; grants tend to be small

Resource Type: Equipment; seed money; technical assistance

Target Audience: Tends toward Christian based organizations

Contact Information:

Watersheds Foundation

302 E. Coronado Rd.

Santa Fe, NM 87505 U.S.A.

Contact: David W. Douglas, President

Tel: +(505) 988-5642

Other:

Organization: Water Supply and Sanitation Collaborative Council

Project Name: Water, Sanitation and Hygiene for All (WASH)

Project Type: health (especially hygiene); sanitation; water supply

Project Description: The Water, Sanitation and Hygiene for All campaign (WASH) is a concerted advocacy and communications campaign to mobilize political awareness, support and action to end the suffering of the 1.1 billion people without access to safe water, and the 2.4 billion without adequate sanitation.

Project Scale: Unspecified

Resource Type: Information for advocacy, networking, knowledge sharing

Target Audience: CBOs; NGOs; private sector; municipalities

Contact Information:

Website: http://www.wsscc.org/load.cfm?edit_id=32 (website provides regional contacts)

Other: WASH does not provide financial assistance, but has assembled valuable tools and information to help promote good hygiene practices as well as promoting political attention to pressing water and sanitation challenges.

Organization: World Bank Group

Project Name: Country Innovation Days (CIDs)

Project Type: not specified

Project Description: An open competition whereby start-up funds are awarded to teams proposing ideas, which bring people and institutions together, and have the greatest scale-up, or expansion, potential

Project Scale: Unspecified; tends to address region or country-specific issues, presenting opportunities for small, locally-based projects

Resource Type: Financial (small grants)

Target Audience: Social innovators

Contact Information:

The World Bank (General Inquiries)

1818 H Street, N.W.

Washington, DC 20433 U.S.A.

Tel: +(202) 473-1000

Fax: +(202) 477-6391

E-mail: dminfo@worldbank.org

Website: www.worldbank.org (search for country innovation days)

Other: See Appendix 15 for region/country specific contacts for: Brazil, Peru, Ukraine, Central Asia; Guatemala, Vietnam, Egypt. Country Innovation Days rotate to different countries depending on year. Check website for up-to-date information.

Organization: World Bank Group

Project Name: Development Marketplace

Project Type: not specified

Project Description: Every 18-24 months, the World Bank organizes and hosts a global competition for innovative development ideas called Development Marketplace.

Project Scale: Unspecified; projects tend to focus on municipalities, civil society, CBOs, and NGOs

Resource Type: financial (seed money); technical assistance

Target Audience: Individuals; NGOs; academic organizations; faith-based groups; local government; private sector companies; official aid agencies; and grass roots organizations. Private sector companies are asked to partner with an NGO or other public agency.

Contact Information:

The World Bank Group Development Marketplace

The World Bank

1818 H Street, N.W.

Washington, DC 20433 U.S.A.

Tel: (202) 473-1000

Fax: +(202)-522-2042; or +(202) 477-6391 (General inquiries)

Email: dminfo@worldbank.org

Website: <http://www.worldbank.org/>

Other: There are no restrictions on who can send in proposals. Ideas should be innovative, effective, replicable, address poverty and development, and be able to demonstrate that they can change people's lives for the better. (See appendix 14 for country offices.)

Organization: World Bank Group

Project Name: Water Supply and Sanitation

Project Type: health (including hygiene); sanitation; water resources management; water supply

Project Description: The Water Supply and Sanitation sector of the World Bank aims to provide safe water and sanitation to people in member countries. Water and sanitation are essential to poverty alleviation, environmental sustainability, private sector-led growth, participatory development, and good governance. The World Bank seeks to ensure that everyone in member countries has access to efficient, responsive and sustainable water and sanitation services. The approach tends to be people-centered, market-based, while also preventing environmental harm. This sector focuses on meeting the needs of both the rural and the urban poor.

Project Scale: Unspecified

Resource Type: Loans

Target Audience: Governments of member countries

Contact Information:

The World Bank (General Information)

1818 H Street, N.W.

Washington, DC 20433 U.S.A.

Tel: +(202) 473-1000

Website: <http://www.worldbank.org/watsan/>

Other:

Organization: The World Bank Group Water and Sanitation Program

Project Name: International Training Network for Water and Waste Management (ITN)

Project Type: capacity building; training/technical assistance

Project Description: ITN aims to build national capacity to meet water and sanitation needs of the rural and urban poor. ITN is a network of local, regional, and international training institutions, which provides information, and promotes local applied

sector research on low-cost water supply and sanitation options. The ITN also provides trainings in low-cost water supply and sanitation.

Project Scale: Unspecified

Resource Type: Training

Target Audience: Network is affiliated with centers in Asia and Africa. Specific centers are located in Burkina Faso (serving countries in francophone West Africa); Ghana; Zimbabwe; Kenya (Ethiopia, Kenya, Tanzania, Uganda); Bangladesh; India; and the Philippines. New centers are under development.

Other: See Appendix 16 for regional ITN contacts.

MULTIPLE SPONSORS

Organization: Center for Disease Control and Prevention (CDC); Population Services International; United Nations Children's Fund (UNICEF); U.S. Agency for International Development (USAID); U.S. Government

Project Name: Safe Water System (SWS)

Project Type: health (including hygiene); water supply

Project Description: The SWS uses local resources, typically involves public-private partnerships and a market-based approach, with strong NGO involvement, and employs community mobilization and social marketing approaches to reduce diarrheal diseases in children under 5 years old and other vulnerable populations. The SWS helps to locally produced water dis-

infectant and safe water storage containers, and advocates behavior change techniques that result in improved hygiene. The SWS is also used as an entry point into households for the promotion and implementation of other health-oriented interventions such as hand washing and sanitation. Other SWS applications include improving street vendor hygiene in beverage preparation and prevention of contamination of fluids used in re-hydrating cholera victims.

Project Scale: Unspecified

Resource Type: Information; low-cost water disinfectant; social marketing; finances

Target Audience: National governments, civil society; Programs currently (or soon to be) underway in: Latin America and Caribbean (Bolivia; Peru; Ecuador; Haiti); Africa (Zambia; Kenya; Madagascar; Malawi; Nigeria; Uganda; Rwanda; Tanzania); Asia (Afghanistan; Bangladesh; India; Laos; Myanmar; Nepal; Pakistan)

Contact Information:

U.S. Agency for International Development Information Center
Ronald Reagan Building

Washington, D.C. 20523-1000 U.S.A.

Tele: +(202)-712-4810

Fax: +(202)-216-3524

<http://www.usaidwater.org>

Other: Though goal is to expand to other countries; view website for updates. See Appendix 13 for USAID country contacts.

Organization: The Cornell Institute for Food, Agriculture and Development; Desert Research Institute/Winrock International; Lions Club International; United Nations Children's Fund (UNICEF); U.S. Agency for International Development (USAID); WaterAid; the World Chlorine Council; World Vision

Project Name: Water For The Poor: The West Africa Water Initiative (WAWI)

Project Type: engineering/infrastructure/technology (particularly urban); sanitation; water resources management; water supply

Project Description: The initial phase will use an Integrated Water Resources Management (IWRM) approach in providing water supply and sanitation to the most vulnerable communities in the West African countries of Ghana, Mali, and Niger. USAID will invest its resources in four key areas: livelihoods and income generation, governance and enabling environments, information management, and gender mainstreaming.

Project Scale: Unspecified

Resource Type: Grants; technical assistance; loan guarantees (for leveraging additional monies)

Target Audience: Communities and governments in West Africa (Ghana, Mali, and Niger); projects have mostly been focused on rural areas, but they are expanding to some peri-urban areas.

Contact Information:

U.S. Agency for International Development Information Center
Ronald Reagan Building
Washington, D.C. 20523-1000 U.S.A.

Tele: +(202)-712-4810

Fax: +(202)-216-3524

Other: See Appendix 17 for contact information to specific partners working with the Initiatives. You can also email Sharon Murray (smurray@usaid.gov). The WAWI is not a grant-making alliance and will not consider unsolicited proposals for assistance. If institutions with resources have interest in collaboration in West Africa or elsewhere, they are encouraged to contact individual WAWI partners or email Sharon Murray (smurray@usaid.gov).

Organization: International Water and Sanitation Centre (IRC), Water Supply and Sanitation Collaborative Council

Project Name: InterWATER: Water Supply and Environmental Sanitation Electronic Network for Developing Country Needs

Project Type: information (primarily about organizations working on projects related to water and sanitation)

Project Description: InterWATER offers information about more than 650 organizations and networks focused on watershed

management, water supply and sanitation, all related to developing countries.

Project Scale: Not applicable

Resource Type: Electronic network, information

Target Audience: Governments; CBOs; municipalities; individuals

Contact Information:

Website: <http://www.irc.nl/interwater/index.php>

Other:

Organization: Japan; United States of America

Project Name: Clean Water for People Initiative

Project Type: sanitation; water resources management; water supply

Project Description: A joint endeavor to provide safe water and sanitation to the world's poor, improve watershed management, and increase the productivity of water.

Project Scale: Unspecified

Resource Type: Grants; loans; local currency investment guarantees (to encourage private investment in water services); technical assistance

Target Audience: Not specified geographically; all countries, including developing countries, regions, international organizations, and civil society partners; activities to date have focused especially on Asia and Africa

APPENDICES

APPENDIX 1:

UN Millennium Development Goals (MDG)

1. Eradicate extreme poverty and hunger
 - Reduce by half the proportion of people living on less than a dollar a day
 - Reduce by half the proportion of people who suffer from hunger
2. Achieve universal primary education
 - Ensure that all boys and girls complete a full course of primary schooling
3. Promote gender equality and empower women
 - Eliminate gender disparity in primary and secondary education preferably by 2005, and at all levels by 2015
4. Reduce child mortality
 - Reduce by two thirds the mortality rate among children under five
5. Improve maternal health
 - Reduce by three quarters the maternal mortality ratio
6. Combat HIV/AIDS, malaria and other diseases
 - Halt and begin to reverse the spread of HIV/AIDS
 - Halt and begin to reverse the incidence of malaria and other major diseases
7. Ensure environmental sustainability
 - Integrate the principles of sustainable development into country policies and programmes; reverse loss of environmental resources

- Reduce by half the proportion of people without sustainable access to safe drinking water
- Achieve significant improvement in lives of at least 100 million slum dweller, by 2020

8. Develop a global partnership for development

- Develop further an open trading and financial system that is rule-based, predictable and non-discriminatory. Includes a commitment to good governance, development and poverty reduction—nationality and internationally
- Address the least development countries' special needs. This includes tariff-and quota-free access for their exports; enhanced debt relief for heavily indebted poor countries; cancellation of official bilateral debt; and more generous official development assistance for countries committed to poverty reduction
- Address the special needs of landlocked and small island developing States
- Deal comprehensively with developing countries' debt problems through national and international measures to make debt sustainable in the long term
- In cooperation with pharmaceutical companies, provide access to affordable essential drugs in developing countries
- In cooperation with the private sector, make available the benefits of new technologies—especially information and communications techniques

By the year 2015, all 191 United Nations Member States have pledged to meet the above goals.

African Regional Water Resources Information System: The Interagency Group for Water in Africa (IGWA):

The IGWA aims to promote joint collaborative activities in the water sector in Africa by the partnering agencies. The UN Economic Commission for Africa (UNECA) has been acting as the secretariat of IGWA since its establishment and the group generally meets once a year to review progress, to exchange information and to plan follow-up-activities. Information on these meetings, as well as updates, links, and news can be viewed on the website.

Website: <http://www.uneca.org/awich/index.htm>

Capacity Development for Millennium Development Goals (MDGs)- Development Gateway Foundation and United Nations Development Programme (UNDP):

This website aims to provide a tool for knowledge networking and information exchange. The focus is on ways to build capacity to meet the MDGs, which came out of the Millennium Summit. Content includes links to upcoming events, news, data, publications, programs, best practices, organizations, training information, and research.

Website: <http://www.developmentgateway.org>

Global Water Partnership (GWP):

The GWP is a partnership made up of those who are involved in water management, including government agencies, public institutions, the private sector, professional organizations, multilateral development agencies. The GWP works to identify the critical knowledge needed at global, regional and national levels, and helps to design programs to meet these needs. The partnership serves as a mechanism to build alliances and support the exchange of information on integrated water resources management.

Green Cross International

Green Cross International, founded by Mikhail Gorbachev in 1993, is a non-governmental, non-profit organization. The organization seeks to help create a sustainable future by cultivating harmonious relationships between humans and the environment. Green Cross programs work to promote a greater respect and care for Earth's community of life in all its diversity, and to address the environmental causes and consequences of wars and conflict. Green Cross has been a leading organization addressing transboundary waters issues.

Website: <http://www.gci.ch>

International Water and Sanitation Centre:

IRC facilitates the sharing, promotion and use of knowledge so that governments, professionals and organizations can better support poor men, women and children in developing countries to obtain water and sanitation services they will use and maintain. IRC provides tools and documentation to help improve the information and knowledge base of the water sector.

Website: <http://www.irc.nl/>

SANDEC:

SANDEC is part of a global network of institutions and organizations active in the fields of Water Supply, Sanitation and Solid Waste Management in developing countries.

Website: <http://www.sandec.ch/links.html>

United Nations Educational, Scientific and Cultural Organization (UNESCO) Water Portal:

The UNESCO Water Portal aims to improve access to freshwater related information on the World Wide Web. The site offers links to current UNESCO and UNESCO-led initiatives on freshwater. It also serves as a place for the exchange of information and ideas for water-related organizations, NGOs, government bodies. The site includes a number of links related to water events, learning

modules, and other on-line resources.

Website: <http://www.unesco.org/water/>

The Access Initiative

The Access Initiative (TAI) is a global coalition of public interest groups collaborating to promote national-level implementation of commitments to access to information, participation and justice in environmental decision-making. TAI has been in operation in a number of countries focusing on water, energy and corporate accountability. TAI seeks to expand to other nations.

Website: <http://www.accessinitiative.org>

The Universities Partnership for Transboundary Waters

The Universities Partnership for Transboundary Waters is an international consortium of water expertise seeking to bring about a culture of global water governance, which incorporates environmental protection, peace, and human security. The consortium is comprised of ten universities on five continents and focuses on education and training to build capacity to address water-related challenges.
